INTERIM RESULTS ANNOUNCEMENT 2014

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Goldenmars Technology Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

This announcement will remain on the GEM website at www.hkgem.com on the “Latest Company Announcements” page for at least 7 days from the date of its posting. This announcement will also be posted on the website of the Company at www.goldenmars.com.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Business Review and Prospect

Looking back on the first half of 2014, as leading suppliers controlled the output, DRAM and flash memory market featured a stable order and the industry maintained a sustained development momentum for a long term. In the second quarter of this year, although the DRAM market was influenced by the rumor of new capacity expansion, which resulted in a wait-and-see market sentiment, DRAM market in the second quarter experienced conservative demands. However, riding on the prudent business strategy and strict inventory control, the Group managed to maintain stable earnings amid rapid market changes in the second quarter, thus further enhancing the development of existing business development and paving the way towards a more robust long-term business model.

After the supply and demand conditions became determined in the second quarter, the short-term correction of conservative demands in DRAM and flash memory market is expected to come to an end; the market is still positive about global conditions, and channels and customers will begin to make arrangement for year-end inventory. The Group will continue to devote itself to the operation scale and development of core business, with a hope of bringing more returns to shareholders in the second half of 2014.

Bozhou Botong Supply Chain Co., Ltd. (“JV Company”) is expected to officially commence production as scheduled in the second half of 2014. The JV Company has resolved to increase its registered capital (“Capital Increase”) on 29 July 2014 (reference to the announcement of the Company dated 30 July 2014). In order to balance the Group’s financial resources with the amount of business risk of the JV Company, the Group did not contribute to the Capital Increase of the JV Company. Following completion of the Capital Increase, the Group’s equity interests in the JV Company will be diluted from 35% to 16.74%. Upon completion of the Capital Increase, there will be no significant changes in the accounting treatment of the JV investment, and the JV Company will continue to be accounted for under equity method and no significant impact on both the Group’s consolidated statement of financial position and consolidated income statement is expected.

The Capital Increase was completed on 31 October 2014 (reference to the announcement of the Company dated 6 November 2014).

FINANCIAL REVIEW

The Group’s revenue decreased by approximately 18.2% from approximately HK\$447.0 million to approximately HK\$365.5 million for the six months ended 30 September 2014 as compared with the Last Corresponding Period.

Decrease in revenue was mainly resulted from decrease in trading orders of DRAM chips and NAND flash due to the reduced market demand, which was partially offset by the trading of a new product, namely CPU chips, from early 2014.

Gross profit margin 7.0% were recorded for the Current Period and 10.5% were recorded for the Last Corresponding Period. Such decrease was mainly caused by the fluctuation in market price of raw materials during the Current Period.

General and administrative expenses for the Current Period decreased by approximately HK\$3.5 million, representing a 30.2% decrease from the Last Corresponding period. This was mainly caused by the decrease in listing expenses, which was partially offset by increase in employee benefit expenses.

The decrease in profit attributable to equity holders of the Company by approximately HK\$14.3 million, or 57.5% for the Current Period was mainly attributable to the decline in revenue and gross profit which was partially offset by the decrease in expenses and income tax expenses.

Increase in trade receivables was mainly because more sales orders were received from customers with longer credit period during the Current Period.
